Photosynthesis Research **57:** 347–349, 1998.

Contents Volume 57 1998

Volume 57 No. 1 July 1998

Review

Plastocyanin, an electron-transfer protein
K. Sigfridsson **1–28**

Regular papers

Fluorescence from low-energy chlorophylls in Photosystem I of *Synechocystis* sp. PCC 6803 at physiological temperatures
B.P. Wittmershaus, T.D. Tran, B. Panaia **29–39**

Changes in the quantities of violaxanthin de-epoxidase, xanthophylls and ascorbate in spinach upon shift from low to high light
M. Eskling, H.-E. Åkerlund **41–50**

Effects of high temperatures on the photosynthetic systems in spinach: Oxygen-evolving activities, fluorescence characteristics and the denaturation process
Y. Yamane, Y. Kashino, H. Koike, K. Satoh **51–59**

Photosystem I-dependent cyclic electron flow in intact spinach chloroplasts: Occurrence, dependence on redox conditions and electron acceptors and inhibition by antimycin A
B. Ivanov, Y. Kobayashi, N.G. Bukhov, U. Heber **61–70**

Dependence of catalysis and CO_2/O_2 specificity of Rubisco on the carboxy-terminus of the large subunit at different temperatures
G. Zhu, R.G. Jensen, H.J. Bohnert, G.F. Wildner, J. Schlitter **71–79**

Massive breakdown of the Photosystem II polypeptides in a mutant of the cyanobacterium *Synechocystis* sp. PCC 6803
E. Kanervo, N. Murata, E.-M. Aro **81–91**

The reaction mechanism of Photosystem I reduction by plastocyanin and cytochrome c_6 follows two different kinetic models in the cyanobacterium *Pseudanabaena* sp. PCC 6903
M. Hervás, J.A. Navarro, F.P. Molina-Heredia, M.A. De la Rosa **93–100**

Volume 57 No. 2 August 1998

Regular papers

Deconvolution of the three components of the photoacoustic signal by curve fitting and the relationship of CO_2 uptake to proton fluxes
H. Tabrizi, K. Schinner, J. Spors, U.-P. Hansen **101–115**

Photoinduced electron transfer and cytochrome content in obligate aerobic phototrophic bacteria from genera *Erythromicrobium*, *Sandaracinobacter*, *Erythromonas*, *Roseococcus* and *Erythrobacter*
V. Yurkov, B. Schoepp, A. Verméglio **117–128**

Purification and characterization of reaction centers from the obligate aerobic phototrophic bacteria *Erythrobacter litoralis*, *Erythromonas ursincola* and *Sandaracinobacter sibiricus*
V. Yurkov, L. Menin, B. Schoepp, A. Verméglio **129–138**

The *pet* operon, encoding the prosthetic group-containing subunits of the cytochrome bc_1 complex, of the purple sulfur bacterium *Chromatium vinosum*
Y.L. Chen, H.B. Dincturk, H. Qin, D.B. Knaff **139–158**

9-Aminoacridine and dibucaine exhibit competitive interactions and complicated inhibitory effects that interfere with measurements of ΔpH and xanthophyll cycle-dependent Photosystem II energy dissipation
A.M. Gilmore, H. Yamasaki **159–174**

Alterations in Photosystem II electron transport as revealed by thermoluminescence of Cu-poisoned chloroplasts
G. Horváth, J.B. Arellano, M. Droppa, M. Barón **175–181**

Characterization of the Photosystem I subunits PsaI and PsaL from two strains of the marine oxyphototrophic prokaryote *Prochlorococcus*
G.W.M. van der Staay, S.Y. Moon-van der Staay, L. Garczarek, F. Partensky **183–191**

The effect of Photosystem II inhibitors DCMU and BNT on the high-light induced D1 turnover in two cyanobacterial strains *Synechocystis PCC* 6803 and *Synechococcus PCC* 7942
J. Komenda, J. Masojídek **193–202**

Changes in the photosynthetic pigments in bean leaves during the first photoperiod of greening and the subsequent dark-phase. Comparison between old (10-d-old) leaves and young (2-d-old) leaves
B. Schoefs, M. Bertrand, Y. Lemoine **203–213**

Volume 57 No. 3 September 1998

Special Issue: PROTON-TRANSPORTING ATPASES AND ATP SYNTHASE

Guest Editor: ANDRÉ TRIDON JAGENDORF

Personal perspective

Chance, luck and photosynthesis research: An inside story
A.T. Jagendorf **215–229**

Minireviews

Energy coupling and ATP synthase
F. Haraux, Y. de Kouchkovsky **231–251**

Nucleotide-CF1 interactions and current views on the catalytic mechanism
G. Girault, G. Berger, J.-L. Zimmermann **253–266**

Regular papers

Structure of V-type ATPase from *Clostridium fervidus* by electron microscopy
E.J. Boekema, T. Ubbink-Kok, J.S. Lolkema, A. Brisson, W.N. Konings **267–273**

Structure function relationship of vanadate bound to a single site in chloroplast CF_1-ATPase as determined by X-ray absorption
I. Sagi, Y. Hochman, G. Bunker, S. Carmeli, C. Carmeli **275–285**

Control of chloroplast ATP synthase (CF_0CF_1) activity by ΔpH
O. Schwarz, H. Strotmann **287–295**

Mg^{2+}-dependent inactivation / H^+-dependent activation equilibrium of chloroplast F_1-ATPase
A.N. Malyan, O.I. Vitseva, O.N. Gubanova **297–303**

Effects of organic solvents and tentoxin on enzyme-bound ATP synthesis in isolated chloroplast coupling factor 1
M. Mochimaru, H. Sakurai **305–315**

Studies on the relation between the fast phase of millisecond delayed light emission and the proton released from oxidation of water in spinach chloroplast
J.-M. Wei, J. Shi, C.-H. Xu, D.-Y. Li, Y.-K. Shen **317–322**

Characterization of a chloroplast inner envelope P-ATPase proton pump
J.S. Peters, G.A. Berkowitz **323–333**

ATP-synthesis in archaea: Structure-function relations of the halobacterial A-ATPase
S. Bickel-Sandkötter, V. Wagner, D. Schumann **335–345**

Contents Volume 57 **347–349**

Author index Volume 57 **350**
